

Development application

Department of Planning and Environment

The development application at 109A CHURCH STREET LIDCOMBE 2141 was withdrawn on 26/02/2024 .

The details of this application are:

- NSW Planning Portal reference number: PAN-312764
- Consent authority's reference number: DA2023/0130
- Site address: 109A CHURCH STREET LIDCOMBE 2141
- Applicant: James Cosgrove

The application was withdrawn for the following reason: The applicant for the proposed development of the organics transfer station at 109a Church Street, Lidcombe has today withdrawn their development application given the recent refusal to further information requests in the review and assessment of development. In light of this, the applicant has withdrawn their application and is committed to revising and resubmitting the development application in the near future.

The applicant remains fully committed to the pursuit of the project and are actively working to address concerns raised by the community and regulatory bodies. The development of key resource management infrastructure such as the proposed is vital to meeting the strategy and policy directions of State and Federal government. The proposed development remains a unique opportunity to provide a sustainable solution to the municipal and commercial (i.e. local businesses) organic waste management needs for the surrounding region and has been designed to a best practice standard for environmental compliance and impact management.

While the decision to withdraw the current application was not taken lightly, we believe it is necessary to ensure that the project moves forward in a manner that aligns with the interests of all stakeholders.

This application can be viewed from within the Completed tab within the NSW Planning Portal.
