Dear Council,

I am writing to object to the proposal DA2023/0130 at 109A Church Street, LIDCOMBE for the construction of a waste management facility. I have been a resident of Lidcombe since I arrived in Australia in 1989. In the last 34 years, I have personally witnessed Lidcombe undergoing tremendous transformation. But should the “Rubbish Tip” be approved, this will mark a monumental step back for this blossoming suburb and I kindly ask the council/ panel to reconsider the proposal.

You have all probably read in excess of 1000 emails reiterating the reasons for objection. It’s solely because of the proposed location that has left residents fuming because it’s a central location close to residential zones and public amenities. The panel should have dismissed the proposal immediately should they have fact-checked the surroundings of this location. Environmental pollution, mental and physical well being compromised, never ending congested traffic on both sides of Lidcombe and various subsequent impacts on local residents will undoubtedly emerge, it’s not a matter of if, but when.

While I understand the need to establish new waste management facility, it must not be in a location where human beings a 100 metres away.

With regards.
