The proposed development application for a waste management centre near residential areas poses serious health risks. The potential release of harmful pollutants, unpleasant odours, and increased traffic congestion associated with waste disposal activities could lead to respiratory problems, lowered air quality, and a decline in our general well-being.

This land should be developed into residential or parkland. The other councils are bringing in such good developments to their locals and we are expecting the same from Cumberland City Council.

*Our community deserves a safe and healthy environment, free from these hazards. We suggest that this Waste Transfer Station should be constructed were fewer or no residential housing/units. **We will appreciate if this essential development be moved far away from residential areas or Town Centre where truck traffic or pollution wont effect the local population.***

We urge you to carefully evaluate the potential consequences of this development and consider the long-term impacts it may have on our community. We trust that the council will prioritize the well-being of its residents and make a decision that aligns with the best interests of our local community.

Thank you for your attention to this matter. I look forward to hearing your response and participating in any future discussions regarding this proposal.

Best regards
