CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

I write to express my strong objection to development proposal outlined in DA2023/0130, pertaining to the demolition of existing buildings & the construction & operation of an organic waste transfer station in our community. As a concerned resident & advocate for environmental preservation, this proposed project would have adverse effects on our neighbourhood, the well-being of its residents, and the overall ecological balance.

I request that Cumberland Council reevaluate the approval of Development Proposal DA2023/0130. It is crucial to prioritise the health and well-being of our community, as well as the protection of our natural resources and wildlife habitats. I also request that a thorough environmental impact assessment be conducted to evaluate the potential consequences of this project on our neighbourhood and its surroundings.

My personal story:

I currently live with my sister at my parents future retirement house and teach students art here in Lidcombe. I have students ranging from age 5~17 come to learn and grow their creativity. More than half of the students live in Lidcombe while the others come from nearby suburbs such as Parramatta, Rhodes, Berala and some come all the way from Gosford and Wollongong. They love coming all the way to Lidcombe every holiday to create masterpieces.

I am very concerned about the dust fumes, bad smell, pollution and the overall negative problems the rubbish centre will bring to our health and the children's. You can see how happy and proud they are from the photo below I am a small local business growing in Cumberland council and always appreciate the support the council provides for the local businesses. I believe the council has everyone's including the children, elderly and the pet's best interest in heart regarding their wellbeing and safety.
