I would like to formally lodge my objection for the proposed development at 109A Church Street Lidcombe NSW 2141 - Construction and Operation of a New Organic Waste Transfer Station.

I am a resident of Lidcombe and reside at _____ . As a local resident and where my property is located extremely close to this new proposed site for the purpose of this proposed development I have several concerns.

There are several concerns which I have however are not limited to the following:

- Increases traffic including heavy vehicles.
- Increased noise pollution as a result of operating such facility in surrounding areas.
- This street where it is located has a railway bridge as part of the access and connection to the other side of the Lidcombe which would lead further potential further congestion in other streets if there are issues with vehicles passing under the bridge as an access point.
- Odours and pests as a result of this waste transfer management. Which is a healthy and safety concern for residents.

Please feel free to contact me to discuss my objections by email.

Kind regards,
