Good evening,

My name is \_\_\_\_\_ owners of  
my best contact number is

My reason for objection is:

- 1. Health Risks:** The construction of a rubbish dump can pose various health risks to nearby residents. Waste materials often contain hazardous substances, such as chemicals, heavy metals, and pathogens, which can contaminate the air, soil, and water. Exposure to these pollutants can lead to respiratory problems, skin irritations, gastrointestinal issues, and other health problems.
- 2. Impact on Children:** Children are particularly vulnerable to the negative effects of a rubbish dump due to their developing immune systems. The contaminants released from the dump can have long-term consequences on their health and well-being. Additionally, the presence of a rubbish dump can limit children's access to clean outdoor spaces for play and recreation, negatively impacting their physical activity and overall quality of life.
- 3. Odour and Air Pollution:** Rubbish dumps can generate strong and unpleasant odours, which can permeate the surrounding areas. These odours often result from the decomposition of organic waste and the release of gases, such as methane and sulfur compounds. Prolonged exposure to these odours can cause annoyance, respiratory issues, and reduced quality of life for nearby residents.

Thank you

Kind regards
