To Cumberland Council,

I would like to object the development of the organic waste transfer station at 109A Church Street LIDCOMBE NW 2141;Lot 1 DP778492

There are several matters of concern that affect the community such as the smell, noise, traffic congestion and dust fumes. There have been newly built apartments that are more or less 100 metres away from the site. These apartments will attract more people adding on to Lidcombe traffic congestion. There will be over 100 truck movements daily increasing traffic congestion massively.

Lidcombe has nursing homes, and has a public school within it, imagine the effects it will have in these areas. The smell and noise would definitely affect residents living in the area since it's so close to residential areas. The rubbish in the trucks could also fly out during transportation even if it is covered. The smell will also spread when trucks are travelling through to the site.

The EIS claims that the hours will range from 6am - 10pm on weekdays, 8am - 6pm on Saturdays while the DCP (Cumberland development control plan) says that the timeframes to be 7am to 6pm everyday except Sunday. The hours are significantly over the DCP timeframe.

This site should be in a fully industrial area with roads that can sustain the weight and damage that trucks will impose not on suburban roads and large residential areas

Sincerely
