Cumberland Council,

My name is . I would like to bring up my concern to the proposal for the construction and operation of an organic waste transfer station at 109A Church Street LIDCOMBE NSW 2141; Lot 1 DP 778492 . File: DA2023/0130 .

Recently there are apartments being built in this area which already caused traffic, parking and hygienic problems in the area. As there are more people living in the area. It already caused a big impact in the area. I am afraid that if a waste transfer station is being built in the area, the situation will be worse as it is too close to the residential area.

There will be more trucks travelling in the area which will cause more noise and big impact to parking and traffic in the area. Furthermore there will be pollution and hygienic problems in the long term and will affect the health of the local residents.

We have been living in the area for many years. We have a good neighbourhood and we love the area but if the situation is getting worse and hazard to our health, we have to leave the area.

Therefore, we strongly object to building the organic waste transfer station in Lidcombe. Alternatively, I suggest building the waste transfer station more far from the residential area.

Thank you for your consideration.

Regards,
