Subject: Objections to Development Proposal DA 2023/0130-Demolition of Existing Buildings and Construction and Operation of an organic waste Transfer Station

To whom it may concern,

I hope you are doing well. I am owner of 31 Princess Street Lidcombe. I'm writing to express my strong objection to development proposal outlined in DA 2023/0130- demolition of existing buildings and the construction and operation of an organic waste transfer station in our community.

First of all, the proposed organic waste transfer station would increase the amount of traffic congestion in the area. There are lots of factories and warehouses in Lidcombe already. There are lots of trucks going through in Lidcombe . We don't want more traffic and noise in here. Further more, the odour comes out from the waste management centre is going to be bad for our environment for our community.

Last but not least, it is inconveniences to us local residents and have a bad impact on the safety of pedestrians. Especially like our family, my children walk to school / train stations every day. And people excises and walk dogs around the park. We don't want to walk around with worry about too many traffic and dust, noise, and bad smells.

In light of the concerns raised above, I request that Cumberland council reevaluate the approval of Development Proposal DA 2023/0130.
