Dear Bhavisha Sheth,

Regarding the above development plan, I and my neighbours are all very strongly against it.

This area is high density residential area including business premises.

At the same street Church Street the high story apartment buildings are under construction which

will be completed soon. Then more residents will reside this street. Who darely wants to build

organic waste transfer station here in the middle of the residential area? It is shocking!!!

It seems that someone ignores the residents who live here darely wants to build waste transfer

station here. Waste transfer station should go away far from residential area.

This is a crazy ideas and application. It should not be allowed here in the middle of the residential

town. We will strongly protest to this development. It should never never be allowed.

I, and my neighbours wants to hear from the council about the result of your decisioin.

Cumberland council should carefully decide about this kind applicatiion.

Newington had a waste management station similar to this, their name and value was so bad

about this. Now why they wants to come here build organic waste transfer station?

Lidcombe is now developing so well as apartment villags, commercial buildings, restaurants, shops

etc. If organic waste transfer station sits here in Lidcombe, the development of Lidcombe town would

go back or stop. People will talk about this and this will sread quickly to the people by mouth to mouth

that in the Lidcombe the organic waste transfer station is built. It is so BAD!!!

My English is not good enough to express what I feel about what a non-sense things happening here.

You do not ignore us and pls listen carefully what and how we feel about this.

Your right decision would be much appreciated.

Regards,
