To the Cumberland Council,

My name is _____ I am a year 10 high school student and I am sacrificing my time to, with the people of Lidcombe, inform the council of how much of a ridiculous proposal this is.

As a Lidcombe resident for over 15 years, I have lived my whole life in this suburb and am absolutely humiliated by the proposal of the rubbish tip/centre in my residential area. The thought of having to drive past a rubbish dump, to even be living near a rubbish dump in a residential area, there are more disadvantages and no benefits for the people of Lidcombe.

Having this facility comes with negative factors for Lidcombe including the stench (odour), the many types of flies, loud trucks, soil and water pollution. No matter how this project benefits the council and the waste industry, Lidcombe should not be having to suffer from a rubbish tip.

Any other city or suburb would have the same opinion with this rubbish tip. Each city would heavily protest against this facility, though I do not understand why Lidcombe has been chosen out of the many cities. Australia has a plentiful amount of land, making it unreasonable to situate the rubbish dump here. I have heard that this is not the first mad proposal that has been introduced to this residential area, and it upsets me as to why the council is trying to make a quickly growing city into a rubbish dump.

I have stated some of the many reasons why this proposal is affecting my family and I

- traffic and vehicle overcrowding: whilst going to school or outside of school (after school), it'll be a hassle

- odour pollution: as human beings, this affects everyone as it cannot be controlled and is not tolerated in our residential area especially where there are many childcare centres, 2 primary schools and an aged-care centre

- noise: as a student that is nearing towards the HSC, having a quiet room to study at home is essential, though the rubbish trucks will be a huge disadvantage to students, as well as babies and children of all years

- environment: Lidcombe is a growing city, so many apartments and buildings are built which are some of the factors that are already affecting the environment (like any other suburb), though Lidcombe takes care of this important necessity, by preserving trees etc. Though this new proposal brings harm that can be undone to Lidcombe's well-protected environment.

The Cumberland Council is meant to protect and support the lives of Lidcombe and should start by getting rid of this proposal.

Thank you,
