Subject: Objection against Proposed Organic Waste Transfer Station

Dear Fay,

I hope this letter finds you well. I am writing as a concerned resident in response to the proposed Organic Waste Transfer Station to be located at 109A Church Street, Lidcombe.

I am deeply concerned that the installation of such a facility so close to the newly built apartment complex where I reside, and other residential areas, will lead to a plethora of issues. This proposed location is merely 180 metres away from our homes, a proximity that I and many others find alarming.

The proposed rubbish tip, due to its very nature, is likely to cause significant disturbances in our community. The daily operations of such a facility involve heavy traffic of waste disposal vehicles which will certainly cause traffic congestion, particularly in our small community streets. The station will inevitably generate noise, odour, and air pollution which will negatively affect the living conditions in our neighbourhood.

Moreover, the existence of the tip will undoubtedly attract pests, creating a significant health concern for all residents living nearby. It is widely known that pests can contribute to the spread of various diseases, and as such, their potential increase in our area is alarming.

A waste disposal facility should ideally be located far from residential areas, where it cannot pose such threats to residents' daily lives and health. The proposed location contradicts this basic principle. It is of utmost importance that this matter is reconsidered and a more appropriate site is selected, keeping in mind the concerns of those most affected – the local residents.

Furthermore, I believe that it is essential to consult with the residents of the area before making such significant decisions that will impact their lives. It is our right to be involved in discussions and decisions about changes to our living environment.

I kindly request that the Cumberland City Council reconsider the planned location of the Organic Waste Transfer Station. It is crucial that we maintain the quality of life for all residents and ensure a safe, clean, and peaceful environment for our community.

Thank you for your attention to this matter. I am confident that the Cumberland City

Council will take these concerns into account and make a decision that best serves the interests of the local community.
