My name is

Dear Cumberland Council,

I hope this letter finds you in good health and high spirits. I am writing to express my strong disagreement with the proposal to construct a rubbish centre in Lidcombe. As a concerned resident and member of the community, I believe such a decision would have detrimental effects on both the environment and the well-being of the local residents.

Lidcombe is a vibrant and diverse neighbourhood that boasts a thriving community. It is home to families, schools, parks, and recreational facilities that provide a safe and nurturing environment for residents of all ages. Introducing a rubbish centre in close proximity to these essential amenities would undermine the overall quality of life we have worked so hard to create.

First and foremost, a rubbish centre in Lidcombe would pose significant environmental risks. The potential for increased pollution, foul odours, and hazardous waste leakage could have severe consequences for the local ecosystem. Our community takes great pride in preserving the natural beauty of our surroundings, and a rubbish centre would undoubtedly compromise our efforts to promote sustainability and ecological harmony.

Moreover, the health and well-being of the residents must be prioritized. The proximity of a rubbish centre would expose us to various health hazards, including air and water pollution, pests, and the spread of diseases. These risks are especially concerning for children, the elderly, and individuals with pre-existing health conditions who are more vulnerable to the negative impacts of such facilities.

Additionally, the negative impact on property values cannot be overlooked. The presence of a rubbish centre in our neighbourhood would undoubtedly deter potential homebuyers and investors. This could lead to a decline in property prices, causing financial distress to the residents who have made significant investments in their homes and the local community.

It is crucial to consider alternative solutions that do not compromise the well-being of Lidcombe's residents. The proposal should explore the option of locating the rubbish centre in a more suitable and less populated area, away from residential zones and vital community infrastructure. By doing so, we can strike a balance between waste management requirements and the preservation of our community's quality of life.

I urge you to reconsider the proposed rubbish centre in Lidcombe and explore alternative options that align with the best interests of our community. The health, environment, and well-

being of our residents should be paramount in any decision-making process. I believe that with thorough consideration and open dialogue, we can find a solution that meets the waste management needs while preserving the integrity of our neighbourhood.

Thank you for your attention to this matter. I trust that you will take my concerns into serious consideration and act in the best interest of the Lidcombe community. I eagerly await your response and hope for a favourable resolution that benefits us all.

Regards,
