Councillor at Cumberland City Council

Subject: Appeal against the Construction of the Organic Waste Transfer Station on 109A Church St Lidcombe NSW 2141

Dear Helen,

I hope this letter finds you well. I am writing to express my deep concerns and appeal against the proposed construction of a waste transfer station in close proximity to our community. This project has the potential to significantly impact the daily lives of nearby residents, schools, and entertainment centres, and I believe it is imperative that our concerns are taken into serious consideration.

First and foremost, the proposed waste transfer station poses a threat to the health and well-being of the residents in our community. The disposal of waste materials in such proximity to our homes and schools brings about numerous concerns regarding air pollution, foul odours, noise pollution, and potential hazardous substances. These factors can lead to adverse health effects, including respiratory problems, allergies, and other related illnesses. It is our fundamental right to live in an environment that is free from such risks.

Furthermore, the noise pollution generated by the waste transfer station would be disruptive and detrimental to the learning environment in nearby schools and the tranquillity of our community. The constant rumbling of trucks, machinery, and the overall operational activities would significantly impede concentration and overall academic performance of students. The negative impact on educational institutions and their ability to provide a conducive learning atmosphere should not be taken lightly.

In addition, the proposed waste transfer station would also have adverse effects on our local entertainment centres. These establishments contribute significantly to the social fabric of our community, providing recreational opportunities and fostering a sense of togetherness. The presence of such a facility in close proximity would undoubtedly discourage patrons from visiting, leading to a decline in business revenue and potential closures. This would not only harm local businesses but also diminish the quality of life for residents who rely on these establishments for leisure and entertainment.

Considering the aforementioned concerns, I kindly request that you reconsider the approval of the construction of the waste transfer station in its current proposed location. I urge you to thoroughly assess alternative sites that are more suitable and do not pose such detrimental effects on the community. By doing so, you would be upholding the principles of sustainable development and prioritizing the well-being of the residents and the future of our community.

I implore you to organize a public hearing or forum to allow concerned citizens, local residents, and community representatives to express their views and present viable alternatives. Engaging in open and transparent dialogue will foster trust, cooperation, and ultimately lead to a decision that serves the best interests of all stakeholders involved.

I have faith in your commitment to maintaining a healthy and thriving community. Please carefully consider the implications of this proposed construction on the daily lives of residents, schools, and entertainment centres, and take the necessary steps to

ensure that our concerns are addressed.

Thank you for your attention to this matter. I look forward to a favourable response and a resolution that aligns with the well-being and interests of our community.

Yours sincerely,
