Councillor at Cumberland City Council

Subject: Appeal to Halt the Development of the Organic Waste Transfer Station at [109A Church St Lidcombe NSW 2141](#)

Dear Helen,

I write to you today with a sense of urgency and resolve that cannot be ignored. Our community stands on the precipice of an unforgivable disaster—the development of an organic waste transfer station. I implore you, in the strongest possible terms, to immediately halt this project and spare our community from the irreversible damage and suffering it will inflict.

The current chosen location for this abomination displays a complete disregard for the well-being of our community. How dare you subject us to the toxic fumes and putrid stench that will permeate our air, poisoning our lungs and infecting our bodies with toxins? The health and safety of our residents, especially our most vulnerable—the children, the elderly, and those with pre-existing conditions—are at stake. Are their lives so expendable in the pursuit of profit and convenience?

Furthermore, the increased traffic congestion resulting from this ill-conceived project will bring chaos and danger to our streets. The cacophony of waste collection vehicles and heavy machinery will drown out the sounds of laughter and joy, replacing them with the deafening clamor of destruction. Pedestrians, cyclists, and motorists will navigate treacherous roads, risking their lives and those of their loved ones. Is this the legacy we want to leave—a community forever scarred by accidents and sorrow?

The environmental impact of this organic waste transfer station cannot be dismissed. The foul odors it emits and the pests it attracts will disrupt the delicate balance of our ecosystem. Our once-pristine environment will be desecrated, our water sources contaminated, and our wildlife driven away. The consequences of such irreversible destruction are unforgivable, tarnishing the very essence of our community.

I demand that you immediately reconsider the location of this abomination. There are alternative sites, far removed from residential areas and sensitive ecosystems, where the detrimental impact on human lives and the environment can be minimized. It is your moral responsibility to ensure the well-being of our community and the preservation of our natural heritage.

I urge you to conduct an immediate and thorough environmental impact assessment, engaging in transparent decision-making processes that include public consultations and the voices of the affected community. Ignoring our concerns and silencing our voices is not an option. We demand transparency, accountability, and a genuine commitment to the welfare of the community you serve.

Failure to heed this urgent appeal will be met with fierce opposition. We, the united residents of this community, will not stand idly by as our health, safety, and environment are sacrificed for the sake of short-sighted gain. We will rally, protest, and utilize every available means to protect our rights and safeguard our future.

It is in your hands to make the right choice—the choice to prioritize the well-being and prosperity of the community over the destructive forces of greed and apathy. I implore

you to act with integrity, compassion, and foresight, putting an immediate halt to the development of the organic waste transfer station.

We demand justice, and we will not rest until it is served.
