Dear Mayor and the Council,

I have deep sense of objection with regards to this rubbish tip being built in the heart of Lidcombe.

I object to this development application due to:

1. Council carelessness and complete disregard to take account into residents overall physical and mental health, safety and well being.
2. This rubbish tip will bring in more traffic and trucks causing massive traffic congestions, dust and damaging the roads with heavy traffic.
3. Why can't they put this rubbish tip which will cause odour pollution and sickness, in the Eastern/Northern suburbs? This is due to the profile of Lidcombe residents made up of working class and migrant population, Council very keenly agreed to accept this development application. This is outright discrimination and racist.
4. I never had faith or trust in the Cumberland Council due to my numerous dealings with them. They are very incapable, corrupt and will try to fob you off when you go to them with issues such as the 13 storey apartment block in Church Street which also has caused tremendous chaos, noise and dust pollution. Till now, your Council has not provided me any sort of noise assessment reports.
5. This is my home and I have every right to have peaceful and comfortable living here in my property and in my suburb.
6. I don't know how much corruption has taken place to accept this rubbish tip application and not to mention the amount of money that has switched hands for this development application to be made in the first place?

This needs some serious investigations especially since it is so close to the 13, 8 and 4 storey multiple apartment blocks given the high density of people near this rubbish tip.

Please provide me with some responses to my concerns.

Regards
