I believe that the proposal for the waste transfer station will impact on my area as it is in within very close proximity, less than 100 metres to the residential area. Roads and roundabouts will be damaged by the ongoing heavy vehicle usage of the area and rubbish on trucks could also 'fly out' during the transport phase. While trucks are indicated to be covered, the reality is that they are not always covered. I am also concerned of 118 truck movements daily – through town and/or residential areas. Finally i believe that this site is not suitable for waste transfer processing – it needs to be within a full industrial area, with major arterial roads, not town centre or suburban roads, and not within such reach of a major residential area.

Thank you
