To whom it may concern,

As a local resident, I am very concerned about the proposal for an organic waste transfer station on 109A Church St, Lidcombe.

My concerns centre around its close proximity to residential areas and the negative impact it would have on air and noise pollution, as well as traffic congestion.

These are already issues in the area and building the facility would not only reduce the quality of life for local residents but also discourage visitors to the area in the future - the latter seems particularly counterproductive with the developments already underway to improve local leisure/hospitality offerings.

Thank you for taking the time to consider my submission.

Kind regards,
