Dear Council,

Some of my concerns regarding the proposed Waste Transfer Station at Lidcombe are:

1. Cumberland Council already has large Waste Transfer Stations at Parramatta Rd, Clyde and at Hill Rd, Lidcombe. Are we expected to shoulder these responsibilities for all the other councils in Sydney.

On the basis of equity there needs to be a survey conducted to determine if these facilities are shared equally across all of Sydney.

2. The traffic rules imposed in the DA for the Waste Transfer Station at Clyde are completely ignored. An example is the fact that the no right hand turn from the west into the site is not policed. The sign has been removed by someone. The backup of waste trucks along Parramatta Rd caused more traffic problems along Parramatta Rd especially now with extra trucks avoiding the tolled M4 section.

3. Where will this waste be transferred to from the Lidcombe site and what will the traffic effect be at the destination station?

4. Rubbish from the Clyde Waste Transfer Station blowing off the site is considerable. Is anybody policing this? This will also occur at Lidcombe.

5. When Waste Transfer Stations become operational they look nothing like the drawings in the DA for the proposed site . Take a visit to the one at Hill Rd Lidcombe to see reality.

--
regards,
