To Whom It May Concern

NO RUBBISH TIP/TRANSFER AT LIDCOMBE

I can not believe that any council would event contemplate on building a rubbish tip transfer of any shape or form in such close proximity to residential site where it would put the entire near by area where there are houses, school, age care, childcare, shops etc at risk of health and safety issues due to smell from decomposing materials, insect infestation, noise pollution, air pollution not only from the rubbish but also from transporting vehicles and their exhaust fumes. There will be horrific traffic congestion as well as further deterioration in the existing road condition due to additional transporting vehicles.

Other councils are trying to build a safe, healthy and desirable suburb yet Cumberland Council is turning our suburb into a rubbish of a place.

Regards,
