Dear Sir / Madam,

I would like to object to the proposal for the construction and operation of an organic waste transfer station at 109A Church Street LIDCOMBE NSW 2141; Lot 1 DP 778492 .  
File: DA2023/0130.

Our neighbourhood is relatively peaceful with predominantly residential dwellings. This has already been disrupted with the ever increasing construction of high density buildings and the many construction vehicles and roadwork diversions created as a result.

The proposed development is only going to make this situation worse.

Further now that Lidcombe is an arterial station where many commuters need to catch connecting trains there is an increased amount of vehicles in the surrounding streets because people park their cars and then catch their train from Lidcombe. The waste transfer trucks will only cause more traffic congestion.

I also, object to the resulting noise, dust fumes and bad smell from the trucks and the plants from the transfer station. As an asthmatic I have serious concerns for my health if this proposal is allowed.

In summary I object on the following basis:-

- Even more traffic congestion
- Noise
- Dust fumes
- Bad smell
- Health Reasons

Your sincerely
