**Reason for objection: the intention to create a waste transfer station less than 100m away from the communities transport, schools, food, restaurants, local shops etc is a gross failure to consider the deliberating impacts this DA will have on the local community. The chosen location is not fit for purpose! Narrow streets prevent appropriate traffic controls of large waste management trucks. Further young kids often frequent the area and with such close proximity to residential communities and schools, the unknown costs from health implications can largely be assumed to grossly outweigh any financial gains. It is assumed the developer has no intention to ensure just outcomes are appropriately accounted for the community through health funds and thus the cost will need to be borne by government. This is not sustainable by any means.**
