Concerns in regards to the proposed build for the organic waste transfer station.

This email is to advise of personal concerns on regards to the approval of this proposed plans

- lidcombe is already so congested, building this plan and causing trucks to go in and out will add to the already congested area.
- It's so close to residential area, the pollution could cause potential health risks to those around the area, has this been considered? What are the mitigations for potential health risks. There have been cases where pregnant mothers living close to an old waste tip area gave birth to babies with birth defects due to water pipes being compromised.
- the smell from the waste plant will impact on the quality of life of those living in the area

Regards
