Dear sir/madam,

In regards the council proposal to build a rubbish station near Lidcombe residential area.

I am strongly objecting this project due to the following important reasons:

- traffic issues will heavily burden the government to resolve and inconvenience for people to/from work even issues for rubbish workers traffic
- Resident health issues when the rubbish becomes poisonous to all humans and government health care will become heavily involved /complaints/compensations etc
- Noise and invisible poison levels of air pollution are arriving due to the rubbish stations standing in these areas.

Suggestion if the rubbish station can be installed in an area far away from residential/business areas will save the government lots of issues and keep our environment healthy.... Wish a correct decision is made by serious consideration from its advantage and disadvantage point for a better/perfect world!

Keen regards
