Subject: [EXTERNAL] OBJECTION to the development, DA2023/0130, Site 109A Church Street Lidcombe NSW2141; Lot1 DP 778492

CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

I really opposed building **the garbage station at 109A Church Street** the reason is:

As Lidcombe is the center of Sydney with convenient transportation, it has enough development potential in many aspects to promote, economic growth and attract more people to shopping.

Now the government wants to promote the construction of such a garbage dump, which has brought us a lot of inconvenience. Air pollution can easily make resident sick, traffic jams can cause chaos and more fire and sanitation hazards.

Transfer stations create unpleasant odors and attract rats, cockroaches, vermin and rodents and natural disasters.

Stormwater impacts- waste enters our local sewage system and pollutes our land.

Environmental impacts such as air pollution, soil pollution and sound pollution.

Affect local commercial value and living environment.

Although the environmental impact statement addresses the odor problem, there is no absolute guarantee that the odor from the dump site can be controlled.

Race race extended to Lidcombe area as trucks drive by.

The smell with affect Lidcombe's businesses as well as physical residential areas.

Yours Sincerely
