Please find Reference Development Proposal DA2023/0130 – Demolition of existing buildings and construction / Operation of an Organic Waste Transfer Station at 109A Church Street Lidcombe NSW 2141.

To whom it may concern,

I would like to raise my objection of the Proposed Organic Waste Transfer Station Project at 109A Church Street Lidcombe as mentioned above regarding the adverse impact it will have on local roads causing damage to them due to the heavy vehicular traffic required for the demolition process of the pre-existing buildings onsite and the construction of the new Organic Waste Transfer Station.

My family and I have lived in the _____ area for well over fifty years and I can remember weekends where horses and riders were on these streets and the surrounding streets were not originally built for the ever increasing high volume of traffic that it is being exposed to daily and the heavy traffic that this project will cause.

My professional background is in High Voltage Electrical Distribution maintenance and supply, But I am currently employed in the planning and delivery of Major Rail Transport projects for the New South Wales State Government and in that capacity, I can fully understand the issues that residents would be concerned of due to this project.

One of the major issues as I see it is that the adjacent residential areas have a high percentage of people living in apartments with a severe lack of street parking and this project will expose them to higher levels of dust and noise pollution with the potential to cause severe medical issues for families who have children with respiratory conditions in the area.

The surrounding area at Lidcombe already is in a state of Construction due to pre-existing projects with congested street traffic in the morning and afternoon peak periods and this should be taken into consideration prior to any decision being initiated by Cumberland Council.

With kindest regards,

OFFICIAL
