Subject: [EXTERNAL] Objection to Development Proposal DA2023/0130 - Demolition of Existing Buildings and Construction and Operation of an Organic Waste Transfer Station

CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Dear Cumberland Council,

I hope this email finds you well. As a dedicated and long-term resident of our beloved local area, I am writing to passionately express my strong objection to the proposed development outlined in DA2023/0130. This proposed project would have bad effects on our community, the well-being of its residents, the environment and the overall ecological balance. I hope you can reevaluate this project in regard to the following issues:

Traffic congestion: this proposed development will affect the local traffic seriously. If the organic waste transfer station is built, there will be 59 trucks coming and going through the local area every day. The resulting delays and gridlocks will not only inconvenience our commuters but also impede the timely response of emergency services. To maintain our community's functionality, it is vital to ensure smooth traffic flow and efficient access.

Health issues: The potential pollution and disturbances arising from this development will cause serious health risks, particularly to our vulnerable groups. The running of organic waste transfer station will produce horrible odor, which will lead to the occurrence of mice, cockroaches and pests. The smoke and pollution of waste station will also affect the health and well-being of local residents and their lifestyles.

Roadworks damage costs: As the trucks will come and go through the local area up to 118 times, the ongoing heavy vehicle usage related to this development may lead to the potential damage on roads and impose on our roadworks. The final damage costs have to be covered by our local residents, which will add to the financial burden of local family. By mitigating these damages, we can alleviate the financial burden on our local residents for repairs and maintenance, ensuring the longevity of our infrastructure.

In light of the concerns raised above, I request that Cumberland Council reevaluate the approval of Development Proposal DA2023/0130. It is crucial to prioritise the health and well-being of our community, as well as the protection of our natural resources and wildlife habitats. I also request that a thorough environmental impact assessment be conducted to evaluate the potential consequences of this project on our neighbourhood and its surroundings.

I trust that Cumberland Council will carefully consider this objections and take the necessary steps to address the concerns raised by concerned residents like me. Thank you for your attention to this matter. I look forward to a prompt response outlining the actions being taken in response to our objections.

Yours sincerely,
