To whom it may concern,

I am writing to object the above DA in concern with few issues;

Lidcombe is currently growing bigger with more residential development. It is already expected to produce large traffic issue as there are only limited road capacity. It seems that the proposal you have on traffic does not count the highly probable increase of traffic volumn with this soon-complete residential housing development nearby. Also I believe large garbage trucks will defeniately cause more complicated problems on our road, including frequent repair of the road surface due to "wear and tear" by trucks.

Although it is proposed to be located in the industrial area I believe it is unavoidable for the trucks to pass the residential area. As my property is located nearby the proposed area it is likely that I would suffer from the noise pollution.

Issues continue....

But most of all I would truly like to know if there was any cases like this before in Sydney, a waste station getting built in much close distance to the residential area?? I do not believe you as a council convinced your residents like myself for this type of facility to be built in Lidcombe where it is steeply growing in population. Please consider to relocate the facility.

Sincerely yours,

a resident on
