Subject: [EXTERNAL] Objection to Development Proposal DA2023/0130 - Demolition of Existing Buildings and Construction and Operation of an Organic Waste Transfer Station

CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Dear Cumberland Councillors,

I hope you are well. I write to express my strong objection to the development proposal outlined in DA2023/0130, pertaining to the demolition of existing buildings & the construction & operation of an organic waste transfer station in our community. As a concerned resident & advocate for environmental preservation, this proposed project would have adverse effects on our neighbourhood, the well-being of its residents and the overall ecological balance. I hope you can reevaluate this project in regard to the following issues:

Roadworks damage costs: As the trucks will come and go through the local area up to 118 times, the ongoing heavy vehicle usage related to this development may lead to the potential damage on roads and impose on our roadworks. The final damage costs have to be covered by our local residents, which will add to the financial burden of local family. By mitigating these damages, we can alleviate the financial burden on our local residents for repairs and maintenance, ensuring the longevity of our infrastructure.

Health issues: The potential pollution and disturbances arising from this development will cause serious health risks, particularly to our vulnerable groups. The running of organic waste transfer station will produce horrible odor, which will lead to the occurrence of mice, cockroaches and pests. The smoke and pollution of waste station will also affect the health and well-being of local residents and their lifestyles.

Traffic congestion: this proposed development will affect the local traffic seriously. If the organic waste transfer station is built, there will be 59 trucks coming and going through the local area every day. The resulting delays and gridlocks will not only inconvenience our commuters

but also impede the timely response of emergency services. To maintain our community's functionality, it is vital to ensure smooth traffic flow and efficient access.

In light of these pressing concerns, I request that Cumberland Council can reconsider the granting of approval for DA2023/0130. Our community's well-being, safety, and quality of life should remain at the forefront of decision-making processes. I humbly request that the objections raised by myself and fellow concerned residents, especially given the close proximity of this development to our residential areas, are given the utmost consideration and weight they deserve.

Thank you for your unwavering commitment to our community's best interests. I have the utmost faith that you will thoroughly evaluate the implications of the proposed development and take the necessary actions to protect and enhance the character and livability of our neighborhood.

Yours sincerely,
