Subject: [EXTERNAL] Objection to rubbish tip

CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Today, I sent this email to you as a concerned citizen, a voice representing countless others who share my apprehension regarding the proposed rubbish tip at Lidcombe. It is with utmost sincerity and a genuine desire to preserve the well-being of our community that I address you today.

As a female, I understand the importance of creating and maintaining a clean and sustainable environment for ourselves, our families, and future generations. The decision to establish a rubbish tip at Lidcombe raises significant concerns about the potential health and environmental impacts that could plague our beloved neighborhood.

First and foremost, we must recognize that Lidcombe is not just a piece of land; it is a thriving community that is home to families, children, and seniors alike. Introducing a rubbish tip in close proximity to our residential areas poses a direct threat to the quality of life we have worked so hard to build. The emissions, noise, and odors associated with waste management facilities can have severe consequences for the health and well-being of our residents.

Furthermore, let us not forget the natural beauty that surrounds Lidcombe. Our parks, gardens, and green spaces are essential havens of tranquility amidst the hustle and bustle of city life. A rubbish tip would jeopardize these sanctuaries, leading to the degradation of our local ecosystem, harm to wildlife, and potential contamination of our precious waterways. We owe it to ourselves and future generations to safeguard the natural treasures we have been entrusted with.

Moreover, the establishment of a rubbish tip can have far-reaching consequences for property values and economic development in our area. Homeownership is a dream shared by many, and its value lies not just in the physical structure but also in the community and surroundings. A rubbish tip could lead to a decline in property values, discouraging potential homebuyers and investors from choosing Lidcombe as their preferred destination. We must preserve the desirability of our community for the sake of our residents and the local economy.

In light of these concerns, I implore the Council to consider alternative solutions for waste management that prioritize the health and happiness of the residents of Lidcombe. In an era where environmental consciousness and sustainable practices are increasingly championed, it is crucial that we explore

innovative waste management technologies, waste reduction initiatives, and recycling programs that can help us minimize the impact of waste without compromising our quality of life.

I urge the Council to engage in open and transparent discussions with the community, inviting expert opinions and conducting thorough environmental impact assessments. Let us work together, hand in hand, to find solutions that reflect our shared values of sustainability, health, and the well-being of our community.

In conclusion, I wish that you would rethink this choice. As a passionate advocate for a clean, safe, and thriving Lidcombe, I implore the Council to heed the voices of its constituents, to consider the potential consequences of a rubbish tip, and to explore alternative approaches to waste management that will preserve and enhance the beauty of our community.

Thank you for your attention and for considering the concerns of the residents of Lidcombe. Together, we can create a future that is sustainable, prosperous, and free from the burdens of a rubbish tip.

Sincerely,
