Dear Cumberland Local Council,

I write to you as a concerned Lidcombe resident regarding the proposed Organic Waste Transfer Station at 109A Church Street (DA2023/0130).

This project, due to its proximity to homes, schools, aged care facilities, childcare centers, parks, and local businesses, threatens the quality of life and tranquility of our cherished suburb.

Operating six days a week with up to 118 daily large garbage truck movements, the station could introduce several critical issues, including traffic congestion, noise, soil and air pollution. Not only does this impact the overall ambiance of our neighborhood, it also poses a potential health and safety risk for residents.

Additional concerns relate to the prospect of decreased property values and the burden of roadwork costs due to heavy vehicle usage.

Such a facility within the heart of our community could irrevocably change the residential, commercial, and recreational environment we have come to know and love.

We strongly urge you to reconsider this proposal and explore alternatives that prioritize community well-being and environmental integrity. Our shared objective should be a safe, clean, and prosperous Lidcombe.

We look forward to your prompt response.
