Dear whom may concern,

I am \_\_\_\_\_ who live in Lidcombe at \_\_\_\_\_ at the moment and move into new apartment built at \_\_\_\_\_ on Aug which is just next to Organic Waste Transfer Station.

I am the person who having serious concerns for Organic Waste Transfer Station.

For Health issue - no idea how to operate that station with additional generating health issue;; air, stink etc. issue  
Any disease with health issue related ,, council will full cover and compensation ??

For location - that location is just next to residential area.  
Why next to residential area??? Why not industrial area??

For traffic issue - all big trucks are line up for in/out for station;; following noise issue, air pollution issue, incident issue etc.

For information issue - have the council informed to people properly for this agenda or information for this station?? what's the impact sectors for living near the station??? Is there any R &D report??

Have you tried to discuss this agenda for everyone??

I haven't got a letters or flies regarding this issue. I heard from others yesterday.

I don't think it is the right procedure to make decisions for living this area with huge impact.

It has to be getting more opinions with superb carefully.

**Best regards,**
