**RE: Objection to Development Proposal Organic Waste Transfer Station-
109A Church Street, Lidcombe NSW 2141**

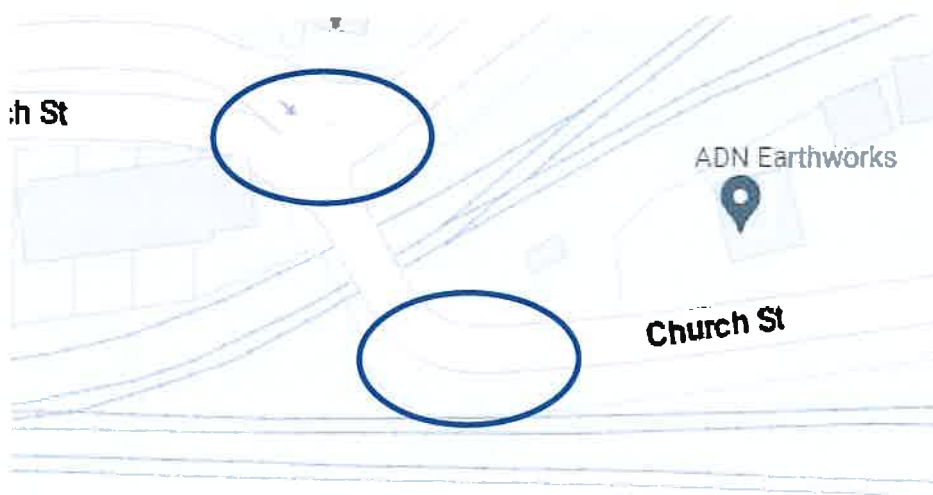

Dear

I'm writing this letter objection to the application number DA2023/0130 on 109A Church Street, Lidcombe NSW 2141 on demolition of existing buildings and the construction and operation of an Organic Waste Transfer Station at Lidcombe, currently Lidcombe is a peaceful and with good surrounding parks and excellent environment for our kids to growth up in our community. I am very concern on the this proposal have greatly affects on our neighbourhood, wellbeing of our community and the airflow, odour and failure of Odour Management System(OMS) Concept, the chaos of traffic(causes car accidents /people injury) and the damage of three narrow street which hardly can fit trucks and cars pass by and lastly, the failure of the OMS system that leaked into the air and to the community in Lidcombe.

I am also very worried about this development that might causes a lot of rats, feral cats, birds(bin chicken, crows etc) in the new building site and surrounding areas includes nearby parks and public swimming pools and Council sewers(large and small), nearby trains lines both under the tunnels and above the surface areas, nearby cemetery(attract all animals to and from) the 109A Church Street site.

I am very concerns on the current traffic around the development of recent construction of new dwellings(three blocks of new building) which added on more traffic congestion in the community further by if accepting this development(DA2023/0130) and both site are very close to each other. The proposal of this Development DA2023/0130 will further impact and greatly affect the existing heavy traffic. In addition, this greatly affect the emergency response times, inconvenience to the local residents and impact on private nursing house and elderly peoples (both in Public nursing home and home-care) resides near the development site.

The three Blue colour circles shown below is just three example where the road is very narrow, the trucks easily can swerve causes car accident include loss of life and injuries.

All trucks and cars travel to and from the development site(109A Church Street, Lidcombe) will be generated a lot of pollution which causes irritation and weakening our body from the burning fuels from the extra trucks and cars. Also, this poses health risk to young children(many of Childcare Centre nearby) and causing asthma.

Please consider with all the valid reasons that I have put forward of objection on Development Plan-DA2023/0130 with all my concerns. They are as follows:

- 1) **Pre construction**(demolition, noises, heavy traffic, air pollution from trucks) – **during construction**(chaos of traffic, increase air pollution) and **After construction**(heavy congestion with trucks/cars from the site)
- 2) Attract unwanted rats, feral cats, birds – including pick up any rubbish/bins and drops it elsewhere
- 3) failure of Odour Management System(OMS) Concept and OMS system that leaked into the air
- 4) Many street are too narrow which easily cause accidents including loss of life and injury.
- 5) Health risks poses from the trucks operating to/from the development on adult, elders, extra cared pension and kids with asthma.

Thank you for your time and consideration.

Yours sincerely,
