Dear Cumberland Council,

I would strongly object to this application. To build a waste transfer station in Lidcombe with ventilation stacks within close proximity to residential areas.

Application Number DA2023/0130.

There are many buildings nearby under construction at the moment and it's not occupied yet. It is not fair that this issue is raised without their awareness and agreement.

It is not acceptable taking into consideration there would be a considerable amount of noise pollution and odour in the local area. It also attract pests ie: rats, birds, and other wildlife in the area.

There have been reports and complaints in the past of odours from the Minchinbury organic waste in western Sydney.

Even the reports state this a fact.

Please see reports : PAN-312764\_216\_MRA Proposed OTS Odour Assessment Report - Addend - DA2023/0130

"Therefore, based on the OMS design features, the January 2023 Report evaluated that odour was the only major air quality risk at the OTS. "

Please take into consideration our concerns and act appropriately to keep the residents in the local area happy and free of air and noise pollution.

I request to suppress my personal information under Section 58 of the Privacy and Personal Information Protection Act 2009.
