SUBJECT:
OBJECTION to DA2023/0130, Site: 109A Church
Street LIDCOMBE SW 2141; Lot 1 DP 778492

To Cumberland Council

I would like to object the above proposal to build an organic waste transfer station on 109A Church St Lidcombe.

In fact, it shows that air and environmental pollution are sufficient reasons to show that the waste transfer station cannot be built in densely populated places! We the people pay attention to living conditions and working in peace and contentment! If you build a rubbish tip at our door, the air will be polluted for hundreds of miles.

Will this allow us to live in peace? Of course we can't live in peace! How can we enjoy our life? We are subjected to environmental pollution every single day, which brings different degrees of damage to our body and mind. Unhealthy residents are bound to bring a heavy burden to our government's medical care. We cannot allow this wrong decision to frustrate our countrymen. Waste transfer station can be built in remote places outside densely populated places. Let's stay away from the dust. Prioritise physical and mental health. Let's all live in this beautiful land of Australia!

Please take consideration the health and well-being of your local residents and stop to build a rubbish tip at our home.

Thank your for your kind understanding and attention.

Yours faithfully
