---

Dear Cumberland Councillors,

I strongly take objection to building the proposed rubbish tip (Organic Waster Transfer Station) on 109A Church Street, Lidcombe, NSW 2141. The reasons for objections are as below:

1. High Population residences are not good places to choose where to build the waste transfer station. It includes St Joachim's Catholic School, Lidcombe Primary School, Canberra Nursing Home, etc only closely by (around 5 minutes walking distance)
2. Traffic congestion e.g. The Licombe Rise apartment on 2- 36 Church Street is built off and more residences will move in this year. More incidents will come up because of not enough parking places, car incidents will also cause the emergency service will not get access sometimes.
3. Negatively impact the young children and new generations e.g. more new childcare centres are built in this area to support the children's right to take Early Childhood Education by government promotion. Children have their right to a peaceful, healthy and not cloudy place. The waste station will definitely cause duse fumes, and smells that will impact children's health and well-being such as Asthma and Anaphylex.
4. Negatively impact the local older residences. My mum will turn 68 years old this coming September. My grandfather is 96 years old this July. We live together and enjoy the local community facilities. The proposed operational times, noises, and lots of large garbage trucks on the road are making their heart and mental health issues.
5. Safety issues on the road when children, older, and disabled people should take seriously consideration so far in Church Street, Railway Street, Arthur Street, Dally Street, Mary Street, etc. (NO Disable Parking, Emergency Parking spots facilities so far).
6. Negatively impact the residents' health and well-being after the COVID recovery period. I have issues with sleeping interruption, an allergy to dust, and worry about coming noise, smells, traffic trucks and road safety for my older mum and grandfather.
