To whom it may concern,

Development Application DA2023/0130 - Organic Waste Transfer Station

I am writing to you today to oppose the construction of the proposed organic waste transfer station at 109A Church Street, Lidcombe.

I am opposing based on the following:

- Excessive increase of heavy vehicle traffic through township to transport and transfer waste to and from waste station
- Further road congestion as the location is not built to sustain heavy traffic
- Increased road maintenance is required due to heavy usage impacting residents and businesses
- Excessive heavy vehicle noise
- Increase pollution from heavy vehicle
- The location is within 70m to dense residential
- The location is under 200m from a cemetery (no one visiting a loved one wants to smell off putting odour)
- The location is under 1km from the closest train station and main township area (Lidcombe)
- There is no detailed documentation showing how odour will be controlled
- There is no detailed research showing that it won't decrease the quality of life (human and environmental)

I have many more reasons, but I think you get the point. Lastly, not only do I live 500m away from the proposed location, but I also work here. I do not want to spend 24/7 trapped indoors and not be able to step outside for fresh air because of odour pollution from whichever way the wind decides to blow.

Think about your residents! Advocate for them!

Thanks and regards,
