To Cumberland Council

Dear Sir/Madam

I am writing to express my objection for the above proposal. It is 100% unacceptable due to the following reasons.

1. Air pollution with dust and bad smell is one of the biggest concerns and threat- Health is our first priority for everyone in the world especially because covid is still not completely over and virus does still exist in everywhere. Therefore the overall hygiene of our homes is still very important for us. According to the weather in Lidcombe in the past, strong winds often occur and it means that the harmful substance such as viruses and germs can possibly pass further and further through the wind. Even the wildfires that happen many suburbs away from Lidcombe in the past can be smelled in our home. Who can fully guarantee no air pollution will pass from the waste transfer station to the public?

2. Traffic congestion is also a big concern in the small road with the big trucks. There are so many local residents from many nearby big apartments. We could not imagine how chaotic and busy in the small street especially if there are traffic accidents.

3. Lidcombe is one of the most rapidly growing population suburbs with so many big and tall apartments being built every year. It is impossible that a rubbish tip is built too close to the local residential properties. This is a significant big risk and threat to our health and safety to the whole local residents at Lidcombe and even the surrounding suburbs as well. Instead I do believe we require a big shopping centre or more local facilities instead of a big rubbish tip.

We sincerely hope Cumberland Council would take into consideration the health, welfare, standard of living and life for many thousands of your local residents instead the profits of one private business. The rubbish tip definitely should not be built within the high density of our local community.

Thanks for your kind attention and understanding.

Yours faithfully
