Hi

I am a local resident and I have strong concerns about the construction of an organic waste transfer station in Lidcombe.

I am a parent. I want to raise my two kids in the local schools and there is already enough traffic in the area that I think the addition of this development will just worsen this further.

I would think that there are other areas better suited for such a development away from residential areas.

Also, based on the location of the development, it is quite close to the cemetery. Is it appropriate to construct a waste transfer station so close to where we bury the loved ones that have also passed?

Please look into this situation and where possible, prevent it from getting through.

Sincerely
