Dear Sir / Madam,

It's shocking to know that a OWTS is planned to build in the heavily residential area. But it is commonly known that any thing associated with Waste categories should be handled extremely cautiously and if have to, the facility related to should be wisely built in an area with safe distance from the neighbourhood where hundreds and thousands people value so much with all of their hopes.

Therefore, as a member of local residents, we would like local government have a second thoughts and listening to the feedback from the local community before making a final decision.

Yours sincerely,
