To Whom It May Concern,

We would like to object to the proposal for the construction and operation of an organic waste transfer station at 109A Church St. Lidcombe NSW 2141; Lot1 DP 778492. File DA 2023/0130.

We are very familiar with the place because we drive by the street to go to our work everyday. We have to reduce the speed to pass by due to the narrow lane and some parking cars on the street. We can not imagine how we would be able to drive across this road if there were big trucks going in and out all day long. We are not doubt the traffic jam would happen. The road would damaged as well.

We love Lidcombe because it is our home location. We noticed the organic waste transfer station are very closed to residential properties. Only around 50ms far, some new units are being built. How poor the people live in the units! The first glance is the rubbish station through their windows in the morning. It also produced noises ,the bad smell and attracts the rats and cockroaches. All of these affect our health and environment.

Object to the points below:

- ✓ Traffic congestion
- ✓ Noise
- ✓ Road damage
- ✓ Pollution
- ✓ Bad smell
- ✓ Impact health of local residents

PLEASE GIVE OUR COMMUNITY PEACE , FRESH AND HEALTH!

Your sincerely,
