To Cumberland Council,

I would like to object to the proposal for the construction and operation of an organic waste transfer station at 109A Church Street LIDCOMBE NSW 2141; Lot 1 DP 778492 . File: DA2023/0130 .

This is due to the following reasons:

1. The proposed DA site is close proximity to residential properties, schools, nursing home, parks and businesses.
2. Church street is a single lane road and cannot afford waste transfer trucks going around the neighbourhood, which will add traffic congestion, noise and air pollution. And increase the likelihood of hazards and accidents for local residents.
3. The organic transfer station will produce bad smell, attract rats, cockroaches, pests and rodents.
4. The hazardous fumes and pollution impact the health, well-being and lifestyle of local residents.
5. Storm water impact - where wastage goes into our local sewage system and pollute our land.
6. Enviromental impact of air pollution, soil pollution, sound pollution.

Object to the following point:-

- \* Pollution
- \* Impact health and well-being of local residents
- \* More traffic congestion
- \* Noise
- \* Bad smell
- \* Hazardous fumes
- \* Environmental impact

Your sincerely,
