To the Mayor Cumberland Council,

I was shocked, horrified and in disbelief when I found out from concerned local residents about the proposal for a rubbish tip to be built in Lidcombe.

How is it even possible for the governing body whose responsibility is to look after the local ratepayers best interest to think that this proposal is good for the health and welfare of the local community?.

Let's look at the facts council:

You just built a number of multiple high rise residential apartments nearby on church street that will be housing hundreds of people.

There are more high rise buildings still under construction in Lidcombe and who knows how many more are planned for the future.

There is also already a waste transfer station nearby just off Parramatta road in Lidcombe even though they now call it Homebush Bay.

You see Council it is people's lives that you will be impacting if this silly proposal goes through.

The traffic in Lidcombe is already horrendous with hardly any parking spaces available in Lidcombe.

When was the last time you tried to go and have coffee or breakfast in Lidcombe town centre council?

Many times I have done two laps around Lidcombe only to go elsewhere where I know I will find parking.

You must knock this outrageous proposal on the head and think about the needs of the local community like you are supposed to.
