**RE: Reject the construction of an Organic Waste Transfer Facility on Church St, Lidcombe.
Proposal DA2023/0130.**

Dear Council Member,

My name is _____, I am a long time resident in Lidcombe.

It has come to my attention of an Organic Waste Transfer Facility being proposed in Lidcombe Church St. This facility will operate daily Monday – Friday (06:00-22:00) with 47 trucks of 20meter in length accessing this facility. This excludes staffing capacity and cars at the site.

With this proposal in a heavily density populated area will have high impact to the limited infrastructure to support the increased in traffic capacity and noise.

Not to mention there are already a newly built high density apartments building blocks on Church St which will add additional traffic to Church St.

I am writing to express my strong objection to the proposed development application (DA2023/0130) for an organic waste transfer plant at 109A Church St, Lidcombe.

I don't believe the impact on traffic, the lifestyle, neighbourhood, environmental impact are fully understood. Yes they have raised impact reports but this does not include assessment to the livelihood of resident. I doubt they have taken responses from the community around the area as part of the assessments.

As a long time resident in Lidcombe I would like to see this suburb preserved from further industrial development and would seek your urgent support to reject this proposal.

Thank you for your attention to this matter and for considering the concerns of those who love our local area.

Yours sincerely,
