To Cumberland Council,

As an engaged and responsible citizen, I would like to object to the proposal for the construction and operation of an organic waste transfer station at 109A Church Street LIDCOMBE NSW 2141; Lot 1 DP 778492.

This area used to be a pleasant and quiet neighbourhood, but following the construction of the apartment at Church street it has become quite the opposite. Traffic congestion has been at an all time high, and the dust from the construction site has polluted the air around the location.

If the construction of the organic waste transfer station continues these would be the least of our problems as community health will be on the line. Dust and dangerous fumes from the trucks and the Plants will detrimentally affect the overall public health around the organic waste transfer station.

Through the construction of the plant Cumberland Council is directly harming its citizens.

Regards,
