To Cumberland Council,

I would like to express my objection to the proposal for the construction and operation of an organic waste transfer station at 109A Church Street LIDCOMBE NSW 2141; Lot 1 DP 778492 . File: DA2023/0130 .

The following are my concerns:

1. The proposed DA site is located too close proximity to residential properties, schools, nursing home, parks and businesses.
2. Church street is a single lane road and cannot afford waste transfer trucks going around the neighbourhood, which will worsen the current traffic congestion, noise and air pollution. And increase the likelihood of hazards and accidents for local residents.
3. The organic transfer station will produce bad smell, attract rats, cockroaches, pests and rodents. This will increase the risk of public health issues resulting more burden on health care system.
4. The hazardous fumes and pollution impact the health, well-being and lifestyle of local residents.
5. Storm water impact - where wastage goes into our local sewage system and pollute our land.
6. Environmental impact of air pollution, soil pollution, sound pollution.

My objection points are:

- * Pollution
- * Impact health and well-being of local residents, resulting more waste on government health system
- * More traffic congestion
- * Noise
- * Bad smell
- * Hazardous fumes
- * Environmental impact

Your sincerely,
