To whom it may concern:

We would like to object to the proposal for the construction and operation of an organic waste transfer station at 109A Church Street LIDCOMBE NSW 2141; Lot 1 DP 778492 . File: DA2023/0130 .

We are the resident of _____ our complex has more than 1000 units and 2000-3000 residents. The proposed waste site is just a few hundreds meters away from our complex.

The proposed DA site is located in such a high density residential area, which raise our serious concerns to the followings:.

1. Health hazard: The waste site will have become a health hazard to the local people due to the chemical fume it emits and pests it attracts.
2. Traffic congestion: The local resident has already been suffering from the traffic congestion, we can not afford to have waste transfer trucks going around the neighbourhood to heavily increase the burden of our roads.
3. Pollutions: The proposed site will cause air pollution, soil pollution, sound pollution, water pollution and have serious environmental impact.
4. Life style: The bad smell will affect the daily life of the local residents.

Your serious consideration of our objection will be highly appreciated.
