Dear Cumberland council,

I want to express my strong will to oppose building Waste Transfer Station at Lidcombe, at 109A Church Street, Lidcombe, NSW 2141.

As young family who have been living at Lidcombe for 3 years, we have been longing for more public facilities built in Lidcombe community. We want more parks, playgrounds, new library, schools including high school to be built. We don't want Waste Transfer Station to be built. It doesn't nothing to improve our quality of life here but create more chaos in the area.

Building a Waste transfer station will definitely create offensive odour, attracts pests and create an unsightly environment. We don't want to live at Lidcombe, breathing polluted air, put up with offensive odours all our life. Our health and mental health wellbeing will be impacted greatly.

Traffic congestion will not get improved if a Waste Transfer station is built. Smelly garbage trucks will become part of the traffic congestions and create more traffic jam, given the situation is getting so much worse already.

The reputation of Lidcombe will be ruined. We already have the largest cemetery in Australia. We can't bear to carry a reputation of smelly lidcombe because there is a rubbish tip Center. We are sure there is better place to build one where the population is less dense.

We strongly oppose building a rubbish transfer Center at Lidcombe. It will create a huge negative impact on our life, health and mental wellbeing, including our children's.

Lastly, your proposal should be notified to all the local residents of Lidcombe. Everyone who lives here should have the right to express their will either by email or by post.

Kind Regards,
