Hello members of the Cumberland Council,

, a resident in close vicinity to the proposed location, specifically

I'm penning this note to express my vehement disagreement with the proposed Organic Waste Transfer Station at the site of 109A Church Street, Lidcombe (DA2023/0130).

Given the site's immediate vicinity to our highly-populated residential buildings and the already busy railway station, the addition of the estimated 118 daily truck movements would inevitably compound the existing traffic issues. This escalation in traffic, coupled with the congestion and noise, presents a serious concern for the safety and well-being of the residents, including myself.

Moreover, the detrimental environmental effects - namely the increased noise and air pollution - cannot be ignored. The vicinity of my home to the proposed site makes these impacts all the more distressing. It is disheartening to imagine our peaceful and vibrant suburb besieged by such harmful side effects.

I also find it essential to highlight the potential negative repercussions on the property values in our locality. We've invested in our homes here with the belief in a stable and thriving community.

Therefore, I fervently request the council to revisit the proposed development and ensure the protection of the residents' interests.

Thank you for your understanding and attention to this matter.

Kind regards
