OBJECTION to DA2023/0130, Site: 109A Church St Lidcombe NSW 2141; Lot 1DP778492

Dear Council,

I would like to object on the idea of adding an organic waste transfer station in our home suburb. As the garbage dump will cause unhappy citizens such as I.

As the organic waste transfer station will be put on Church street as you need to clear the trees in the surroundings decreasing the trees and causing traffic. A3 highways increase vehicle traffic due to the blockage.

Church street is a common to pass as to if you add an organic waste transfer station it would reek the area with an unpleasant smell. As Lidcombe continues to grow as to in the future more people it would affect the citizens in the long term as developing diseases such as childhood cancer, asthma, cancer, cardiovascular disease, COPD (Chronic Obstructive Pulmonary Disease), preterm delivery, birth defects and low birth weight.

If the station has no space left for garbage and you transfer it somewhere else we can't use that piece of land because the rubbish that is being dumped there is still going to be decaying underground. When the garbage is still decaying you cannot build anything on it because every house needs to have concrete under the house to keep it from flooding and toppling over. You may just say "Just add concrete over the garbage". But some soft garbage may break down and the concrete will crack and the house will collapse.

Please help to keep our hometown safe and clean. **NO RUBBISH TIP!**

Sincerely
